

# Danmix Calf Food Supplement™

A concentrated vitamin, mineral and growth promoter supplement for addition to saved colostrum, liquid milk, wholemilk powder, buttermilk powder, skim milk powder or calf weaning meal for promoting healthy, vigorous growth in calves for the prevention of vitamin or mineral deficiencies.

## Active constituents-

### Vitamins

	Per 1.0 g (Min. dose)
Vitamin A	10,000 iu
Vitamin D3	1,600 iu
Vitamin E	24 mg
Vitamin C	60 mg
Vitamin K3, B1 (Thiamine), B2 (Riboflavin), B6 (Pyridoxine), B12 (Cyanocobalamin), Nicotinic Acid, Pantothenic Acid, Folic Acid, Biotin.	

### Minerals

Copper, Cobalt, Iodine, Iron, Magnesium, Manganese, Zinc, Selenium (3ppm).

## Indications

Until the rumen is fully developed, microbial protein synthesis will be inadequate for maximum potential weight gain. Therefore, high quality dietary protein is important.

Colostrum, or first milk, should be fed for the first 3 days of life, then milk or milk replacer to between 5 and 8 weeks, with access to meal and total dependence on roughage at about 12 weeks.

The feeding of Nutritech's Calf Food Supplement should be commenced at the first opportunity in the life of the new born calf and up to 12 weeks of age.

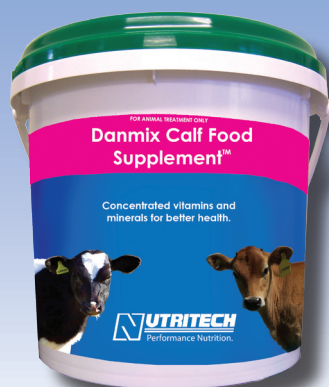

## Feeding instructions

Individual- 1 to 1.5 grams per calf per day depending on liveweight and level of environmental stress.

Note: Four level 15 ml scoops measure 50 grams.

Bulk Mixes- 50 grams per 25 kg of milk powder or calf weaning meal.

Calf Food Supplement is an integral part of Nutritech's Calf Rearing Programme.
