

Immustart™

Immustart is an oral paste containing beneficial bacteria, dried egg powder (a source of active proteins and immunoglobulins to provide passive antibody protection), and vitamins A & E: nutrients to boost the natural immune system of calves.

Active ingredients: (Per 15ml dose)

- Beneficial Bacteria: 165 million colony forming units each of:
Dried Lactobacillus acidophilus
Bifidobacterium thermophilum
Bifidobacterium longum
Enterococcus faecium
- Dried Egg Powder- Source of active proteins and immunoglobulins
- Vitamin A 15000 iu
- Vitamin E 750 iu

ADMINISTRATION:

Immustart is administered orally between teeth and cheek.

Orally dosed calves using a Genesis Application Gun on days one, three, and five after birth.

Each dose to be 15ml: 3 doses per calf.

In situations of known viral challenge, increase dose on day one to 30ml.

KEY BENEFITS:

1. Simple, easy to use oral paste.
2. Aids in development of natural immune system.
3. Provides beneficial bacteria and immunoglobulins to boost natural immune system response to bacterial and viral infections of young calves.
