The Nutritech Calf Range

The Nutritech Calf Range

DanCalf® Gold

Nutritech's most comprehensive nutritional supplement for calves. DanCalf® Gold contains the impressive DanCalf® Plus formulation PLUS includes Levucell® SB live yeast, which promotes favourable lactic acid producing bacteria.

Contains per 5 g dose (elemental):
 ImmuBoost® 100 mg, Agrimos® 2000 mg, biotin 0.04 mg, cobalt 0.2 mg, copper 3 mg, folic acid 0.2 mg, iodine 0.4 mg, iron 40 mg, lasalocid sodium 60 mg, Levucell® SB 10 billion CFU (colony forming units), magnesium 20 mg, manganese 18 mg, nicotinamide 8 mg, pantothenic acid 6 mg, selenium 0.003 mg, vitamin A 10,000 iu, vitamin B1 1.6 mg, vitamin B2 2 mg, vitamin B12 0.012 mg, vitamin C 60 mg, vitamin D3 1,600 iu, vitamin E 24 mg, vitamin K 0.8 mg, zinc 20 mg. **Do NOT feed to bobby calves.**

7.5 KG / 25 KG

DanCalf® Plus

The premium calf food supplement containing everything that growing calves need to get the best start in life. Calves are born with a sterile gut, which becomes colonised as calves pick up bacteria from their environment. Some of these bacteria are highly beneficial for improved digestion of colostrum and milk, but some are harmful bacteria which can cause scours.

DanCalf® Plus contains probiotic, ImmuBoost® and prebiotic, Agrimos®, which help to ensure the calf's gut is populated with high numbers of beneficial bacteria whilst suppressing numbers of harmful bacteria. Agrimos® and ImmuBoost® are complementary to one another as the prebiotic aids the establishment of the probiotic bacteria as well as priming the calf's immune system and helping combat harmful bacteria. DanCalf® Plus also contains powerful coccidiostat, Bovatec® which is clinically proven to increase growth rates when fed to calves. Additional vitamins and trace elements ensure your calves reach their full potential.

Contains per 4 g dose (elemental):
 ImmuBoost® 100 mg, Agrimos® 2000 mg, biotin 0.04 mg, cobalt 0.2 mg, copper 3 mg, folic acid 0.2 mg, iodine 0.4 mg, iron 40 mg, lasalocid sodium 60 mg, magnesium 20 mg, manganese 18 mg, nicotinamide 8 mg, pantothenic acid 6 mg, selenium 0.003 mg, vitamin A 10,000 iu, vitamin B1 1.6 mg, vitamin B2 2 mg, vitamin B12 0.012 mg, vitamin C 60 mg, vitamin D3 1,600 iu, vitamin E 24 mg, vitamin K 0.8 mg, zinc 20 mg. **Do NOT feed to bobby calves.**

6 KG

Preserve colostrum and milk, establish good gut health, vitamin and mineral status and prevent coccidiosis. Manage calf issues and save more.

RumenX®

A highly digestible and nutritious starter pellet specifically designed for young calves. RumenX® allows utilisation of nutrients from day 1 of age allowing earlier weaning consume. Combined with the specialised RumenX® rearing programme, calves have the best opportunity for maximum rumen development while consuming significantly less milk.

Ingredients: Maize, soybean pellets, corn gluten meal, yeast, rice, soybean, coconut oil, molasses, palm oil, MDCP, salt, sodium carbonate, methionine, lysine, threonine, sodium monensin (Rumensin® 20%), FE sulphate, B.H.T, manganese oxide, zinc oxide, sodium selenite, vitamins and minerals.

15 KG

Calf Vigor

A liquid milk additive containing the anticoccidial Bovatec® and vitamins for feeding to calves from 2 days of age.

Contains per 25 ml dose:
 β carotene 1 mg, lasalocid sodium (Bovatec®) 50 mg, vitamin A 250,000 iu, vitamin C 50 mg, vitamin D₃ 12,500 iu, B group vitamins b1, b6, b12, niacin and biotin. **Do NOT feed to bobby calves.**

10 L

ImmuStart®

The rotavirus pathogen is the biggest single cause of infectious scours in young calves resulting in lost animals and long term poor health. ImmuStart® is a probiotic and vitamin supplement with ingredients that are important for antibody production to reduce the effects of pathogenic challenge.

Contains per 15 ml dose:
 Lactobacillus acidophilus 165 million cfu, Bidobacterium thermophilum 165 million cfu, Bidobacterium longum 165 million cfu, Enterococcus faecium 165 million cfu, dried egg powder as source of active proteins, vitamin A: 15000 iu, vitamin E: 750 iu.

80 ml / 300 ml / 100 g

ImmuBoost®

A probiotic which comes in both paste and powder form containing four strains of beneficial bacteria for rapid colonisation of calves' guts to help lower gut pH. ImmuBoost® paste conveniently delivers 4.1 billion CFUs (Colony Forming Units) per 5 ml dose, whilst ImmuBoost® powder for large scale calf rearers provides 11.4 billion CFU per 1 g dose.

Contains per 1 ml:
 Lactobacillus acidophilus 400 million cfu, Enterococcus faecium 400 million cfu, Bidobacterium longum 10 million cfu, Bidobacterium thermophilum 10 million cfu.

80 ml / 300 ml / 100 g

NutriCare® Colostrum Keeper

Making sure all calves receive six to seven litres of high quality colostrum within 12 hours of birth is THE most important step in calf rearing. NutriCare® Colostrum Keeper works by acidifying fresh colostrum to preserve nutritional and immunological benefits for up to 3 months. Affordable, safe to handle, and convenient. Can also be used in whole milk, milk replacer or antibiotic milk.

Contains: 2-hydroxy-1,2,3-propanetricarboxylic acid. A 2kg pack will treat 2000 L of milk.

2 KG

Sterilite® Plus

A highly effective oxidising agent that is effective against all known classes of virus and both gram positive and gram negative bacteria. Once made into solution, its red/orange colour allows you to see its 'killing ability' for up to 7 days. Sterilite® Plus contains powerful surfactants, making it ideal for routine disinfection of animal accommodation. It's non-irritant and non-corrosive formulation means it can be used as a one-step disinfectant safe for all surfaces, equipment and instruments. Sterilite® Plus kills at exceptionally high dilutions, as approved by UK MAFF and is effective in hard or soft water and in the presence of organic matter.

Contains potassium monopersulphate, sodium dichloroisocyanurate, sodium hexametaphosphate, sulphamic acid and sodium do-decyl benzene sulphate.

Dilution Rate:

- 1:100 (eg. 100g in 10L of water) for calf housing, animal pens and for fogging.
- 1:75 (eg. 100g in 7.5L of water) where there is a known disease problem.

Effective Against: Viral Diseases: Rotavirus, Foot and Mouth, Swine Vesicular disease, Newcastle disease, General Disorders, Avian influenza, Blue Tongue, Sheep Pox and Glanders. Bacterial Diseases: E. Coli 0157, Salmonella, Campylobacter, Listeria, Escherichia Coli, Mycoplasma galliseptium, Pseudomonas aeruginosa, Proteus vulgaris, Staphylococcus aureus. Fungi and Moulds: Candida albicans.

50 g / 500 g / 2.5 KG / 5 KG

SIMPLY THE BEST

RumenX® & DanCalf® Gold

- **RumenX®** maximises the limited time available (first eight weeks)* for rumen papillae development for superior rumen development and calves are better prepared to digest and absorb nutrients from pasture and other supplementary feeds. *Dr James Quigley, Iowa State University
- Allows for earlier weaning which means calves consume significantly less milk (approx 110L vs 220L) resulting in reduced labour costs and time, as calves are on once-a-day milk feeding earlier and off milk at 42 days of age.
- Heifers produce significantly more milk (an extra 0.26kg MS/cow/day)** in their first lactation. **Based on New Zealand trial work
- **DanCalf® Gold** is the most comprehensive nutritional supplement for calves. DanCalf® Gold includes Levucell® SB live yeast which promotes favourable lactic acid producing bacteria.
- Contains vitamins, minerals, coccidiostat, probiotic and prebiotic to aid in better growth, health and good digestive tract condition.
- Offers superior gut and immune development, helping calves reach their full genetic potential.

Everything you need to give your future milking herd the best start in life, optimising their potential.

Quality is Assured

To address the issue of residues in trace minerals that are of major concern to feed and food safety, Nutritech adheres to a strict code of quality assurance. Nutritech ensures its products are manufactured to the highest standards, to ensure product integrity and traceability. Our raw materials are sourced globally. All raw materials are supplied with a certificate of analysis confirming mineral content and screening results for undesirable substances, in particular heavy metals, dioxins and dioxin like PCBs. Independent local testing is regularly conducted to confirm product specifications, providing a robust process to confirm the integrity of all raw materials and products. Nutritech operates under the ISO 9001 Quality Assurance and GMP guidelines.
